Hamberley Neurocare Southampton

Off Frogmore Lane, Southampton, SO16

57

Ensuite rooms

1

Apartment

Hamberley Neurocare in Southampton will provide rehabilitation, recovery, and residential care for people living with complex neurological conditions.

Set to open in summer 2024 in Nursling, on the north-west side of Southampton, the service will have a physiotherapy gym, medical consulting rooms and lounges, dining rooms, and a café bar.

With 57 ensuite bedrooms and a spacious self-contained independent living apartment, Hamberley Neurocare Southampton is built around the requirements of people living with complex needs. It elegantly combines style and function to create an environment of comfort, possibility and potential.

At Hamberley Neurocare, we place the people we support at the heart of our service and shape our specialist care and rehabilitation around their unique needs.

There is no such thing as one-size-fits-all with us. Working together with individuals, families, and care commissioners, our clinical team, multi-disciplinary therapists and innovative Life Skills Specialists ensure the highest quality outcomes for the people we support.

Funders can be confident that rehabilitation is cost-effective, with responsive therapeutic and nursing input which changes as people progress towards their goals.

Care and rehabilitation for complex conditions and symptoms

- Neurological conditions including MND, MS, Parkinson's and Huntington's disease
- Traumatic, acquired and hypoxic brain injury
- Spinal cord injury
- Stroke
- Cognitive and behavioural conditions
- Tracheostomy management and ventilated care
- Neuropalliative and end-of-life care
